Letter From The **BrainBox**

SEAMFIX began with a vision to enrich the lives of people through technology. This vision is so deep-seated in our core that for over 14 years, even as our business offerings changed from time to time to suit the world's demands for technology, every internal and external business move, every innovation down to the simplest feature, every marketing effort, every CSR initiative was and still is geared towards that vision.

From our developers to our growth drivers, Seamfix as a brand exists to empower businesses and people to lead a better life and achieve set goals. We envision a world of possibilities and are passionate about making remarkable changes in the society, hence, our tagline - Value innovation powered by technology.

As a leading provider of technological solutions, we prioritize value over anything else with solutions that are poised to digitally transform the way businesses serve their customers so that they can continually deliver satisfaction to end-users.

We create value for businesses, enabling them to push the frontiers of technology in order to stay on the cutting edge of innovation and remain relevant in their niche.

We have always been keenly aware that by helping our customers run their businesses more productively, we incur a major responsibility to foster sustainable development. We are in the business of helping individuals simplify processes and enable smarter living; this way, everyone is happy and better satisfied.

As Group C.E.O of Seamfix, I'm privileged to lead a dedicated team of problem-solvers who share a deep connection to this vision, and are relentless in their drive to actualize it. This drive has continuously earned us commendations from our esteemed clients and our technological prowess has earned us global recognitions and awards in diverse sectors.

I would like to take this opportunity to extend my deep appreciation to our business associates and customers for your continued faith in the company and its management. With the future in sight and in mind, we will take a consistent approach with our vision to enrich people like YOU and businesses like YOURS through the enabling power of technology.

Thank you.

Chimezie Emenwaku
Group C.E.O

Who We Are

We are a people and software development company. We call ourselves **Seamfixers!**

What We Do

Most organizations want to easily acquire and service a lot of customers digitally but struggle with complex processes and compliance issues. We help by seamlessly automating these processes so that they can be more productive, make customers happy, and boost revenue.

Our Goal

We're committed to identifying every human, so businesses can provide genuine services globally to customers – empowered by a true and reliable digital record.

Top
Talents

Proven
Track Record

Global
Recognition

Multi-industry
Experience

In-house

Mindset

*For every successful Story, there is a Vision.
For every fulfilled Vision, there is an achieved
Goal. For every achieved Goal, there is an
audacious Mindset.*

Our solutions are mission-critical, and tailored for the telecommunications, government, financial institutions, education, public and private sectors throughout Africa and emerging markets. We take a consistent approach to creating and delivering innovative technology solutions that empower businesses in the aforementioned sector to do the following:

Onboard with compliance

We provide solutions that strike the balance between meeting regulatory requirements and creating a seamless customer-centric onboarding experience, so that customers are activated almost immediately in a risk free environment.

Gather insights for growth

We believe that decisions should be data-driven not based on presumptions and that is why we build technologies that support digital data collection and predictive analytics to make insights readily available for businesses to make informed decisions.

Build trust with verified identities

We want every business to operate with transparency and the peace of mind that their customers are exactly who they say they are; and so we power solutions that verify identities and curb fraudulent activities associated with identity theft thus eliminating corruption.

Transform the tertiary institution

We digitally transform the way tertiary institutions store academic records; simplify the way alumni request and obtain their transcripts; and make it possible for receiving organizations to clear up doubts about any academic records.

Automate telecommunication processes

We enable telecommunications operators and Internet Service Providers to meet KYC regulatory compliance with ease, automate airtime recharge and data top-up, and offer subscribers the future of customer service and convenience.

Become a digital business

We offer technologies that automate existing manual processes between a business and its customers so that everyone can have a better quality of life, and businesses are guaranteed continuity

Expand beyond boundaries

We empower businesses to expand their customer base and boost their revenue streams through a viable network of agents (equipped only with their smartphones), and monitor insights and activities of these agents wherever and whenever.

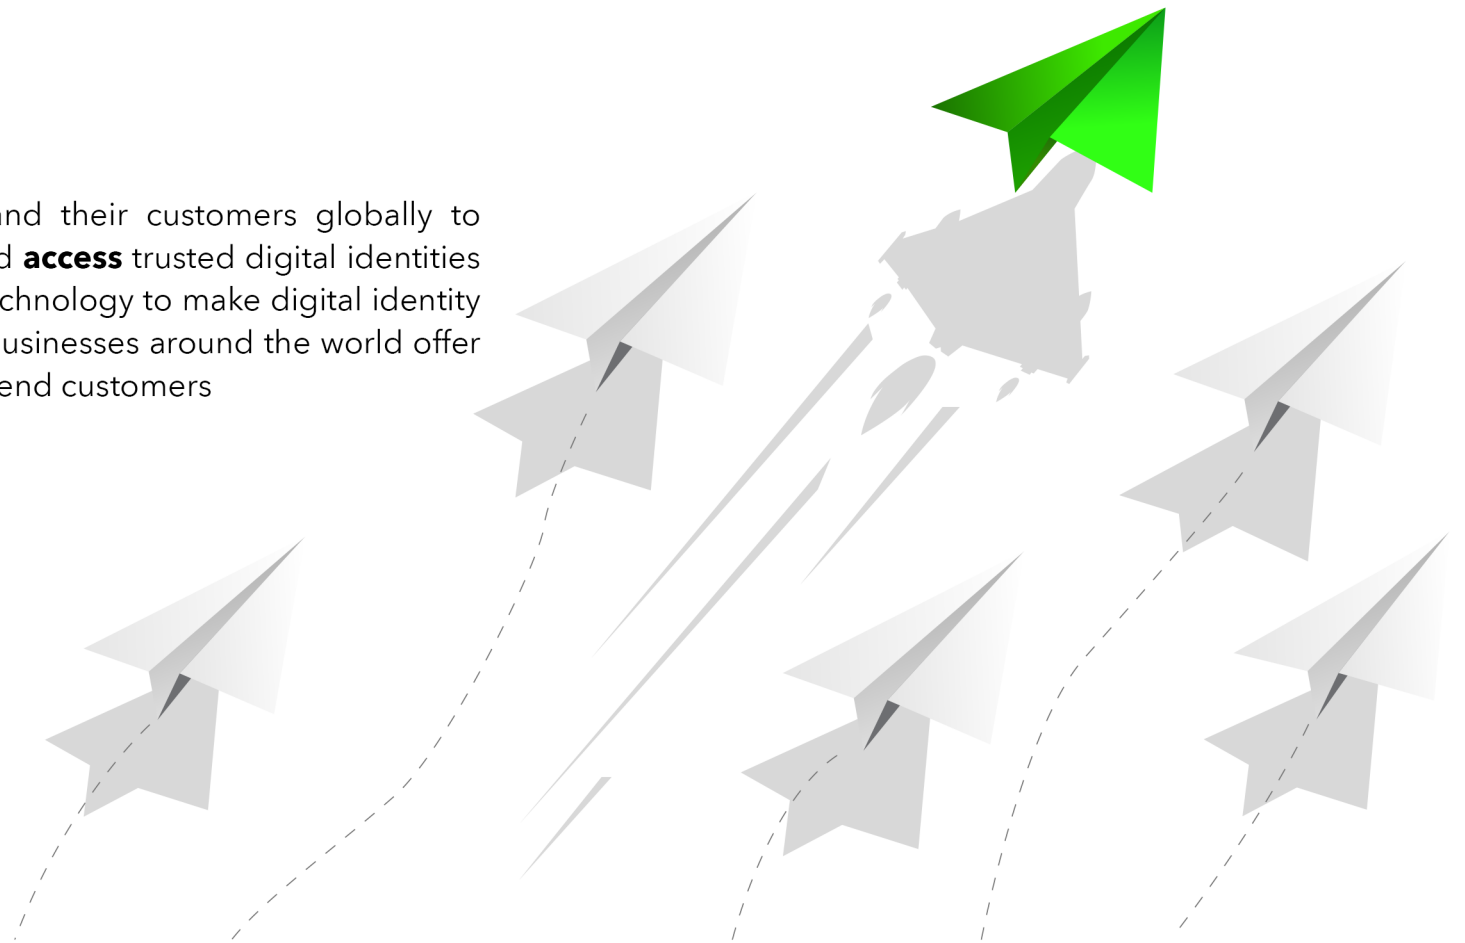

Our **Vision**

Enabling trust in the way we **work, live and learn**

Our **Mission**

Seamfix helps businesses and their customers globally to seamlessly **create, verify** and **access** trusted digital identities and services. We leverage technology to make digital identity easy, helping thousands of businesses around the world offer better services to millions of end customers

Welcome to our Tribe

Collaboration

Agile Problem Solving

Continuous Improvement

Employee Satisfaction

The Seamfix Story of Growth

The Seamfix story is one of dedication, humble beginnings, and grit. The story begins with 4 wide-eyed dreamers, all different in upbringing and physical appearance but alike in their vision for the world. You see, these men believed so much in the power of technology and foresaw a world where everyone's lives are enriched through technology.

This vision birthed the idea for Seamfix. When they started, our founders weren't particular about a problem they wanted to solve, still, they knew there were problems companies faced that could be solved with technology. It was much later we started to find focus and streamline our services into our core business strength.

With only N75,000 (about \$500 at the time) in their arsenal, they set out to build a mini startup with big ambitions at the forefront. One would think it was uphill from there, but in truth it was a bumpy road.

Running the business from the somewhat empty sitting room of a one bedroom apartment, with the loud rumble of an overworked generator and the occasional whining sound that indicated the depleting level of the fuel, our enthusiastic founders hurdled around their mediocre laptops writing lines of codes day and night.

Soon, they learnt that having a vision was one thing and sustaining that vision, well that was a thousand things. A vision is like a baby that must be fed and nourished to stay alive. And so began their hustle to raise money to feed this precious baby. From hawking honey on the busy streets of Lagos to managing commercial buses, these men were true to their course. At the end of a bustling day, they would wash off the sweat and don the cape of problem-solvers, undeterred.

As you know, it all paid off. They got their first big client through the power of wit, dedication, preparedness and just sheer grace of God. After this, 4 became 2 and the rest is a beautiful story of growth.

Visit our website www.seamfix.com/aboutus to read more on our history.

Our Solution

Verified Identity Suite

We're building a robust engine with a focus to combine every identity database in Africa so you can seamlessly identify your customers, increase revenue and eliminate digital fraud.

Face Matching

Capture facial images of individuals so you can put a face behind every genuine customer.

Liveness Detection

Prove the identity of your customers and verify they are living and real by checking for movements in real-Time.

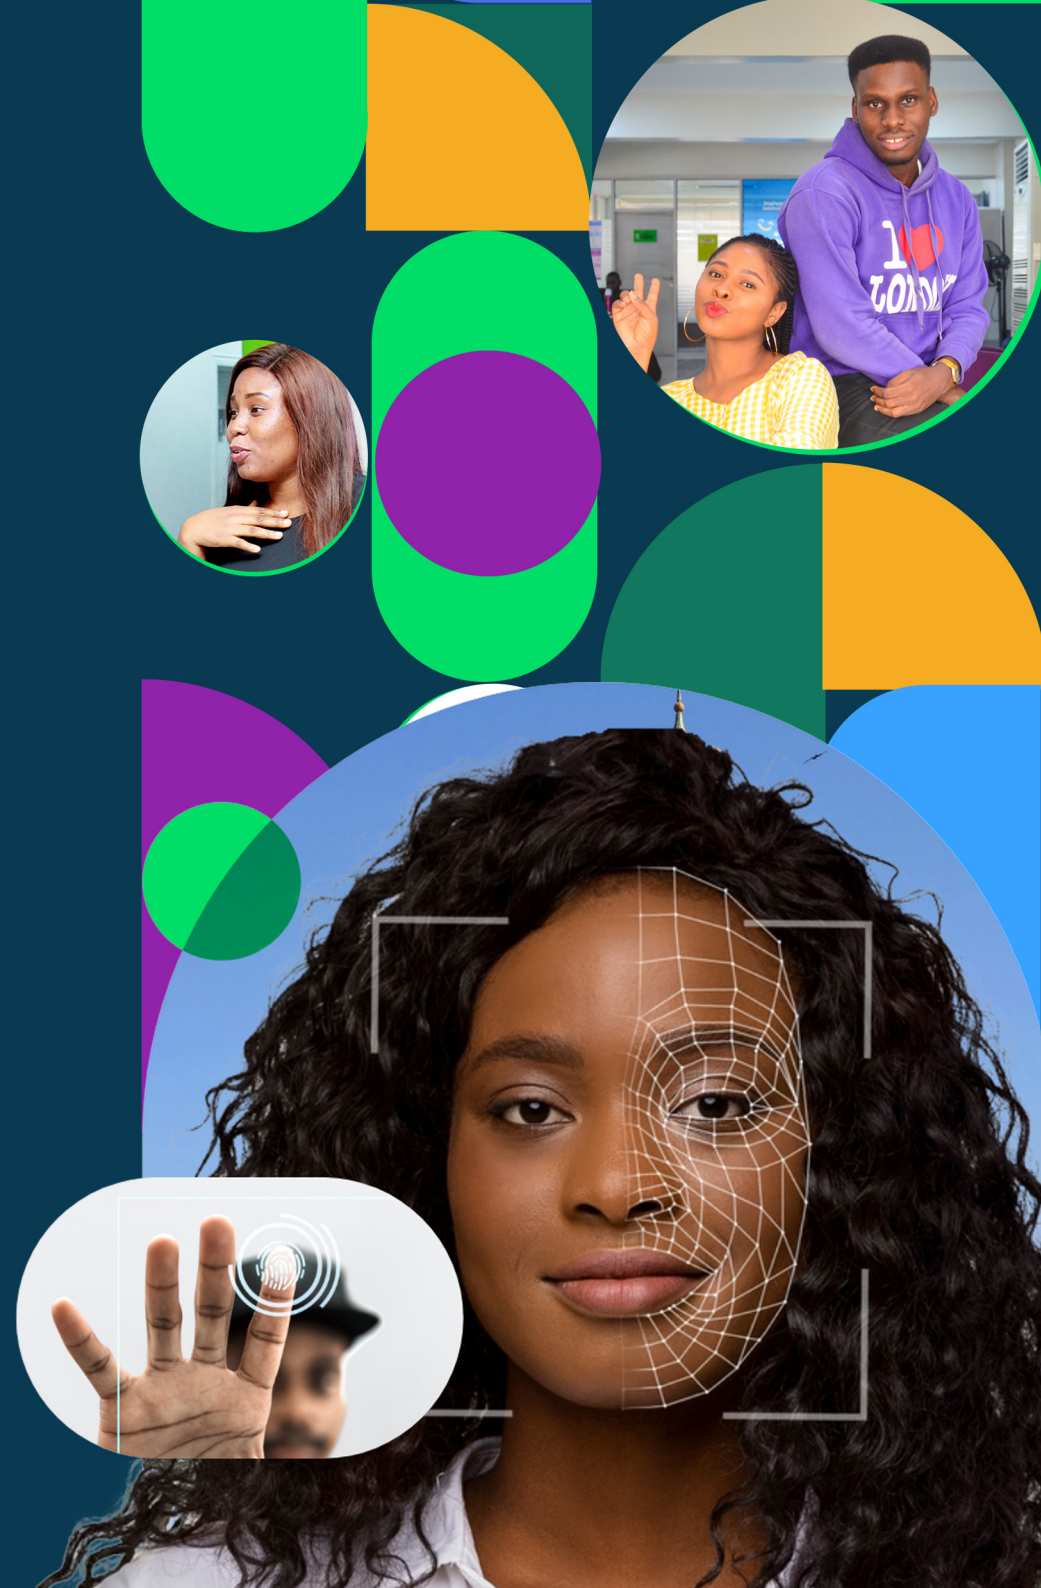

Physical ID and Document Recognition

Confirm a user's identity by checking their ID records against numerous official databases across Africa.

Biometric Consent

Enable your customers to provide biometric consent in a secure manner using machine learning that gets smarter with every transaction.

Our Solution

Biometric Tech Suite

Perform digital registration for one or millions as you capture high-quality biometric data like fingerprints and facial details for smooth user onboarding and Identity enrollment.

Background Cleanup

Our state-of-the-art engine can identify and separate humans from the background, ensuring you never miss a facial detail.

Full Biometric Support

Implement fingerprint identification, facial recognition, Iris and retina pattern recognition to onboard customers and meet high-quality KYC standards.

Contact & Contactless Capture

Perform Face to ID matching with aliveness and presentness checks, close by and at a distance to create and confirm an individual's identity.

Our Solution

Verifiable Credential Suite

Provide trusted services to customers as you easily create, verify and issue authentic credentials, so every transaction with your footprint is credible and secure.

Blockchain Technology

Allows for easy credential creation and tamper-proof digital storage.

Integrated Cloud Platform

Get insights into core activities assigned to agents and workers in different locations from a central point.

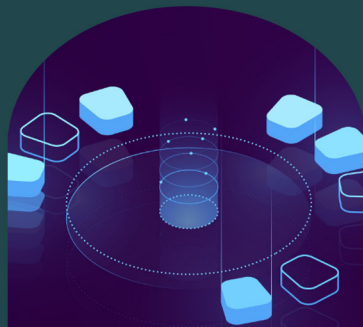

Core Biometric Capabilities

Prove the correct identity of your customers or workers by verifying their documents or facial details.

Request and Processing Platform

Seamless web portal to process credentials and transactions online.

Real-time alerts and notifications engine

Never miss out on any appointment or official task with timely notifications for set reminders.

Our Achievements

For over a decade, Seamfix has dedicated her all to helping businesses achieve their business goals using technology, thus impacting the lives of millions in the process.

Here's what we have achieved so far:

Recognized as a market leader in the SIM Registration space, Seamfix has delivered SIM registration solutions to MTN, Airtel, defunct Starcomms, and Glo.

Years ago, our SIM registration solution, BioSmart was instrumental in the business remaining viable after significant regulatory compliance issues had led to record breaking fines and threatened the existence of the company. Seamfix provided the fastest SIM Registration delivery service ever to MTN Nigeria in a groundbreaking period of just 10 days, by rebuilding and upgrading the MTN Nigeria Biometric SIM Registration Suite. This is un-officially the fastest SIM registration implementation in the world. We helped MTN comply fully with the regulatory requirements of NCC as it relates to clean and quality data.

Our **Achievements** *(cont'd)*

Seamfix has also delivered solutions to help eliminate ghost workers for over 13 state governments, ensuring that government agencies do not bleed cash and resources on individuals posing as workers. This we also did/do for security companies; curbing any case of guard impersonation and reemployment through identity theft.

We also empower businesses to spread their business offerings across locations and even nations by leveraging on our robust agent management systems.

Our solutions are constantly simplifying the processes of customer onboarding, ensuring that businesses can acquire and convert individuals into customers from anywhere even outside their place of business. We streamline the process such that turnaround time is reduced and customers are able to begin enjoying the business services almost immediately.

Aside Nigeria being the grassroot in which the Seamfix was formed, we have extended to Uganda.

Seamfix has officially acquired the ISO 27001:2013 information management and security (ISMS), ISO 9001:2015 Quality Management System and ISO 27701:2019 Privacy Information Management System (PIMS) certifications.

Seamfix is the first in Nigeria, and first software development company in Africa to get the ISO 27701:2019 Privacy Information Management System (PIMS) certification.

Furthermore, Seamfix has acquired the Cyber Essentials Certification. We are PDPO-Uganda, NDPR/GDPR compliant.

Our Awards

Our Capabilities

Our capabilities enable you to have clarity of identities on the two sides of any human or business transaction, so you can strengthen relationships with existing customers and acquire new ones.

IDQR

The Seamfix IDQR is a technology that encodes biometric and textual data that can be used to identify an individual and generates a unique code that can only be read and verified by the custom IDQR mobile application.

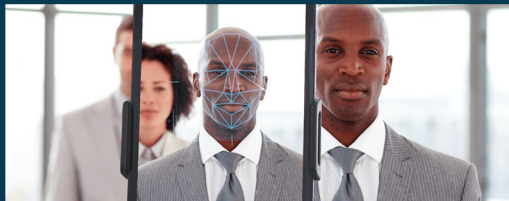

Background Cleanup

Enables removal of a picture's original background using the Seamfix background cleanup model.

Face Matching

Face matching uses a set of rules to detect a face in an image and then compare that face to a face or other faces to determine if there is a match.

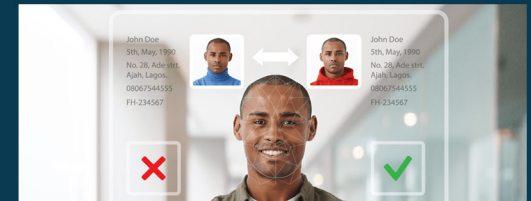

Liveness Detection

Liveness detection checks if the image being captured is a live image or a picture of a picture.

Physical ID to Live Face Match

Provides real-time identification which enables identifying an image/face on a physical ID and matching it with a face in a live picture.

Deduplication

This features identifies extra or duplicate data in a dataset and deletes it so that one is stored

Our Capabilities

Our capabilities enable you to have clarity of identities on the two sides of any human or business transaction, so you can strengthen relationships with existing customers and acquire new ones.

Contactless capture

The Seamfix IDQR is a technology that encodes biometric and textual data that can be used to identify an individual and generates a unique code that can only be read and verified by the custom IDQR mobile application.

Fingerprint Quality Check

Liveness detection checks if the image being captured is a live image or a picture of a picture.

SDK Fingerprint support

Enables removal of a picture's original background using the Seamfix background cleanup model.

ICAO Check

Face matching uses a set of rules to detect a face in an image and then compare that face to a face or other faces to determine if there is a match.

Seamless KYC onboarding with utmost compliance!

We partner with local regulatory bodies to deliver innovations that enable forward-looking organizations with a focus on identity management to carry out compliant biometric enrolment across Africa and make their customers happy with a streamlined onboarding experience.

SIM registration perfected!

Go digital with SIM registration and eliminate the constraints and errors of biometric validation. Easily capture identities using a mobile device, manage deployed capture agents, track devices and kits used across the biometric project, and prevent frauds like SIM swap scam.

Telecommunications

We are your trusted one-stop platform for disruptive telecommunications solutions! We innovate and provide technologies that digitally transform legacy systems and automate customer facing processes so you can boost your competitive advantage and address the industry's growing needs.

Visit www.seamfix.com

Banks & other financial institutions

We empower your bank to completely digitize all customer-facing processes and touchpoints to allow for ease of service inside and outside the bank, improve customer acquisition and retention, and ultimately boost your revenue stream.

Visit www.seamfix.com

Paperless account opening in the field

Meet unbanked individuals anywhere "on the streets" and convert them to fully banked customers of tier one, two and three accounts without them needing to go back into the banking hall.

Agency banking for financial inclusion

Expand your retail operations and be at the forefront of achieving financial inclusion with our robust agency banking solution that empowers agents to offer high quality micro and macro banking services outside the bank.

Paperless everything!

Go green, go paperless! With digital forms comes a new and improved way to do virtually everything which means; more optimized business processes, improved customer experience, increased productivity, and ultimately sustainable revenue stream.

Seamless loan application, anywhere

Automate the loan application request process for a faster and smoother experience even outside the banking hall. From data collection to verification to authentication, offer your customers the flexibility of on-the-spot services.

BVN/NIN enrollment and verification on-the-go

As certified by the Nigeria Inter-Bank Settlement System (NIBSS), we empower bank agents/marketers to enroll, validate, and link BVN for customers and potentials, anywhere within 24 hours.

Government

We are your trusted one-stop platform for disruptive telecommunications solutions! We innovate and provide technologies that digitally transform legacy systems and automate customer facing processes so you can boost your competitive advantage and address the industry's growing needs.

Visit www.seamfix.com

Holistic process digitization

The most efficient governments across the globe rely on data-driven digital solutions to support a variety of policies that bring about the growth of the economy. We offer a full digitization suite for government agencies to transform their processes and meet the evolving needs of citizens.

Powering seamless primary data collection

Going fully digital will offer government agencies a flexible approach to everything data collection. From asset enumeration to population census, we guarantee seamless data capture with speed, online and offline

Civil workforce management

Nullify the threat of ghost-workers in government establishments by collecting the biometric details of civil workers and matching them against authentic databases. We power this project on any scale.

Revenue management

Be on top of your agency's many revenue sources and automate the processes of revenue management – from collection to tracking.

Education Tertiary institutions

We offer a solution for tertiary institutions to completely automate the processes for transcript digitization, verification, request, processing and delivery; and process automation services to boost Internal Generated Revenue (IGR).

Visit www.seamfix.com

Transcript digitization services

Enjoy efficiency and speed in transcript processing and delivery by digitizing students' academic records to be stored in your institution's database.

Records verification services

Defend the integrity of your institution's results by offering a self-served portal for the verification of results, documents, certificates and other academic records.

Process automation for transcript request

Mitigate against the problems of untreated transcript requests and compromised academic records; and instead, ensure your alumni are better served in the shortest possible time with ease.

Data Analytics for Business Intelligence

Mine data and represent it in forms that can be visualized, understood and interpreted to make informed intelligent business decisions for the growth and development of your institution.

Records management warehouse

Store the information and academic records of all students (past and present) safely and orderly on the cloud to be accessed by only authorized personnel whenever the need arises.

Security

We are dedicated to making security workforce management a breeze, by solving the challenges of KYC and identity management so you can focus on more important aspects of the business, excite your customers, and ultimately meet your overall business goals

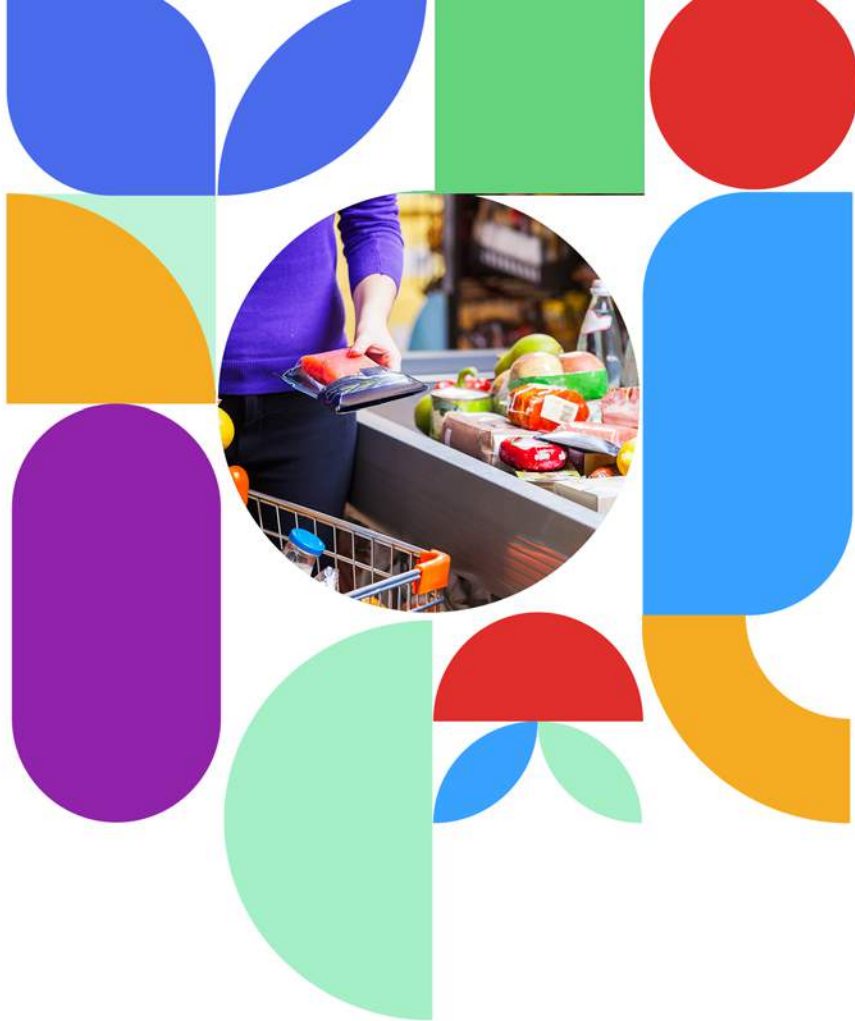

Visit www.seamfix.com

Data digitization and Identity management

Protect your company's image; avoid impersonation by collecting and verifying vital information of security operatives, including texts and biometrics, before they join your force.

Holistic workforce management

Harmonize digital information of your staff in one-suite to protect against unsuspecting reemployment of security operatives who have been relieved of their duties, especially on criminal grounds.

FMCG

We empower FMCGs with innovative technologies to revamp their core processes and thrive in harsh business scenarios through data, analytics, and automation.

Visit www.seamfix.com

Data capture and analytics for competitive intelligence

Create dynamic web forms to capture any type of data needed; collate and churn data into intelligent insights necessary for market domination.

Get targeted market insight

Capture geographical data and gain full awareness of what's going on in each retail space based on real-time geographical data.

Take your business to the world

Expand your reach through the power of trained agent networks. Be on top of your agents' activities and monitor insights in real-time.

Retail census, the digital way

Employ digital technologies to carry out retail census and gather information on all your retail outlets to make competitive decisions.

Our Products

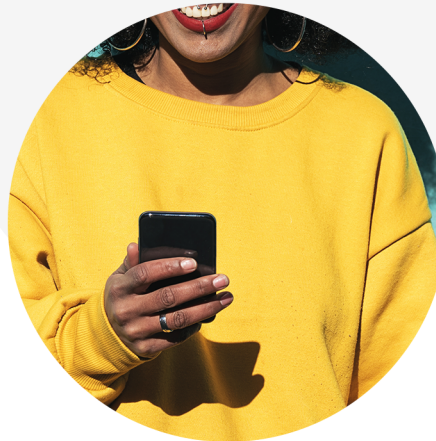

Visit www.seamfix.com

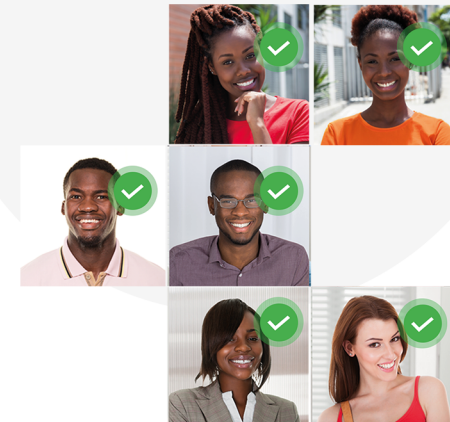

Protect your business from risks and fines by powering your KYC processes so that you can strictly adhere to regulatory compliance requirements for enrolment and biometric registrations. This solution proves itself in the telecommunication industry by solving all SIM registration challenges for both new and existing subscribers.

CivilRegistra is a robust software designed to enable and empower digital inclusion and accessibility to eligible citizens. The data enrolment solution runs on the Android OS, Windows, and the Web. Also ensures that eligible applicants are captured and capable of acquiring both textual and biometric data while ensuring internal standards for biometric data acquisition.

Ensure your customers are real and exactly who they say they are, so you're doing business with only verified people and at the same time adhering to stipulated rules for enrollment as set by regulatory bodies. With us, your business can foster all-round inclusion by offering citizens verified proof of identity to access services and resources within their rights.

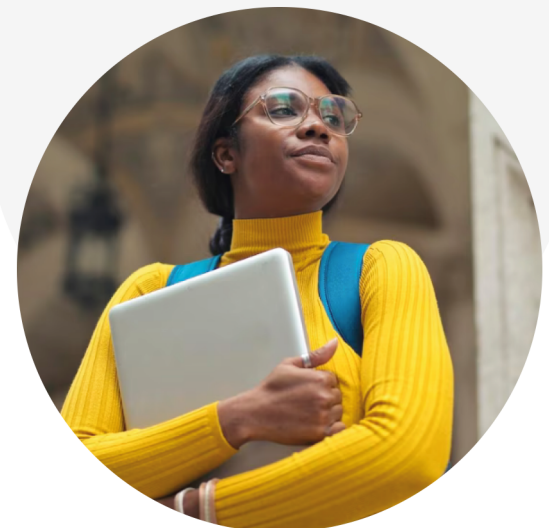

Embrace digital transformation and boost your school's ratings when you offer your students/ alumni a consumer-centric way to conveniently request academic records and have them delivered in the shortest time possible. Ensure efficiency and speed in administrative and operational processes, and ultimately improve your revenue generation.

Never lose your mobile device in the field with a centralized platform for holistic management and security. Assign, map, authenticate, identify, track, and manage all mobile devices across diverse locations, seamlessly and digitally; ensure device and data security and enforce compliance with device handling and standard operating procedures.

Seamfix Care allows for authentication and generation of occupational health certificates, it enables the proving of health status and professional information of workers through a credential issuance, management and verification platform. It allows employers access to staff data- health records, professional certifications, and competencies of their workers etc. on one platform via a web portal.

Our Services

IT Advisory and Strategy Development

We stay up-to-date on technology even as it evolves, so we are always ready with the best innovation advice to steer any business in the best direction for growth and market domination. When you make us your trusted IT consultants, we will work hand-in-hand with your team, at a pace that is just right for your business to implement and test technologies until we find the perfect fit.

Managed IT Services

We are always on the lookout for businesses to offer Peace-of-Mind-As-a-Service to by taking up full responsibility of their outsourced IT services and leading the charge without hitches. When you trust us with this duty, you are able to rest easy knowing that we are on top of the management and maintenance of all IT operations under our jurisdiction.

Field data collection

We are eager to furnish your business with the right insights to meet your customers and grow exponentially. Pick your location, tell us the type of data you need and let us handle the rest from there.

API Services

With us, you are empowered to adapt your business needs quickly and stay competitive in the ever shifting digital markets with our API services that will digitally transform your operations and upgrade your business offerings to support deployment of innovative services. What our **Customers** are saying about us.

"We appreciate your work because the entire work done by your team, as well as the selfless support rendered are exceptional. Due to your company's efforts, enthusiasm and commitment, our organization was able to achieve remarkable results within a relatively short time. This is particularly commendable as your company had a very short window to implement MTN Nigeria's request."

Soyinka Shodunke

(CIO, MTN Nigeria)

"Through the use of BioRegistra, the capture in Katsina was recorded as smooth, peaceful and safe."

**Honourable
Abdul Kadir Zakka**

*(Commissioner for
Local Government and
Chieftaincy Affairs,
Katsina State).*

"Seamfix's BioRegistra has been instrumental in our bid to document our large workforce spread across Nigeria. Seamfix's approach of offering the biometric data capture platform as a service has also made biometric enrollment projects less daunting."

Timi Adebayo

(Head of IT services, Halogen)

"The timing of the release of the BioRegistra product by Seamfix was just-in-time. CloudCover had just identified the need to carry out a know your customer (KYC) process before onboarding any customer and integrating with their platform via provided APIs was seamless with the modular design of our systems. Today, Bioregistra powers an integral part of our business process."

Martins Ebiri

*(Group infrastructure and
systems manager, CloudCover)*

Our **Commitment to people and society**

SDGs, CSR, and Partnerships

SDGs

The Seamfix Impact:

Taking action to build a more sustainable and resilient future for all.

Beyond the need to heed the company's call for greater achievements, we believe that our vision to build an improved, equitable and inclusive society where we can all thrive without leaving anyone behind can only be achieved with the realization of Sustainable Development Goals (SDGs).

Seamfix is driven by this core belief, ensuring through our impact that we maintain an emphasis on Sustainable Development Goals to deliver growth with purpose. Our sustainability approach is categorised into various pillars that identify the areas we focus on, to ensure we operate responsibly and sustainably.

Here are the SDGs we contribute to:

3 GOOD HEALTH AND WELL-BEING

Our people are at the heart of Seamfix and their health and wellbeing matter to us. Our holistic employee wellness approach focuses on physical, emotional and spiritual health, financial wellness, and ensuring that our working environment and community engagements create positive impacts for our employees.

4 QUALITY EDUCATION

In a bid to improve the overall quality of education and skills of the less privileged in the country, Seamfix ensures that all individuals have access to relevant, free, equitable and quality education.

As a company we have engaged in fostering seamless learning through the provision of educational tools to various institutions at large, and also promoted technology innovation and academic excellence through knowledge hubs, hackathons, etc.

5 GENDER EQUALITY

Within and outside the organization, Seamfix fosters an environment for equal rights amongst the female gender where women have greater involvement in decision making, leadership, mentorship, etc.

We aim to ensure that Seamfix is a more inclusive place to work, by advancing the representation of women, for example, vacancies are being filled by females at managerial and other levels or recruited into the existing or new roles.

8 DECENT WORK AND ECONOMIC GROWTH

As one of our core values implies "Employee Satisfaction", it is crucial for us to understand the sentiment around human resource management and to highlight areas where Seamfix can improve employees' work lives.

At Seamfix, we believe that the biggest impact to contributing to the economic growth of the country is through job creation and improving employment opportunities. We believe that our efforts to improve the workplace for our employees contributed to our Jobberman award as number 29 as best 100 companies to work for in Nigeria.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

As a people and software development company, our emphasis is on developing reliable and sustainable infrastructural solutions that support economic development as well as human well being, while also ensuring financial affordability.

10 REDUCED INEQUALITIES

As an organization with a youthful employee base, we will continue to drive our hearts and minds strategy, working towards organizational equality and agility, enhancing the employee experience, building a high-performance culture and embracing digital employee-centric solutions.

11 SUSTAINABLE CITIES AND COMMUNITIES

We provide mission-critical software solutions for multiple industry sectors & government agencies by improving the quality of customers journey through process automation and digitization.

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

As thought leaders in the identity space, we ensure safer society through our identity management products and services provided to government agencies.

Our CSR

Enriching lives is part of who we are

At Seamfix, we strongly believe that, beyond the immense benefits of our business to the society, we have a critical role to play in building a world where everyone, irrespective of their background or economic status, has all the support that they need to reach their full potential.

Over the years, this belief has continued to drive our strategic focus and significant investments in Community Development and Education which we believe are some of the fundamental pillars to building a strong and sustainable society.

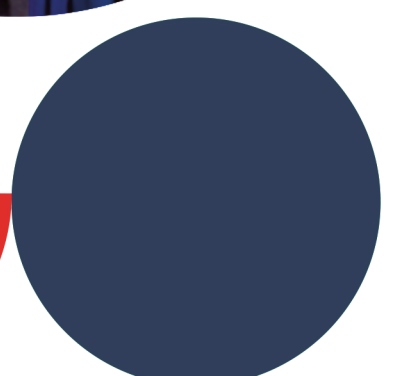

- Fostering seamless learning through the provision of educational tools
- Impacting the educational system in the Ihiala community in Anambra state with an e-library accessible to all students. in collaboration with MTN Nigeria.
- Promoting technology innovation and academic excellence through hackathon challenges for students, graduates, and national youth corp members.
- Serving as the hub for education and skills development in the tech space.
- Empowering youths and solving unemployment issues in Nigeria.
- Employee Volunteerism program: Seamfix Staff Launch **#AnActofKindness** Initiative to put smiles on the faces of the less privilege.

SLUM-TO-SCHOOL X SEAMFIX

Fostering high-quality learning for low income societies

In a bid to improve the overall quality of education and skills of the less privileged in the country, Seamfix has donated educational items like exercise books, pens, pencils, and library materials to the Slum-To-School Child Support Community .

Our Partnership Program

Let us grow as one!

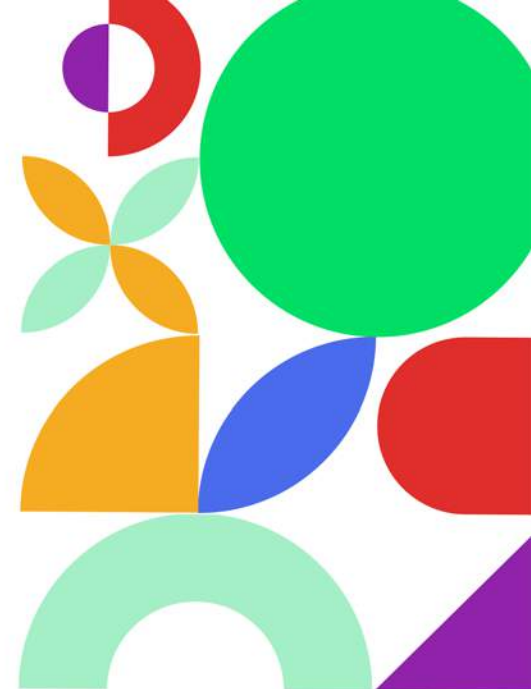

When you partner with us, you become an integral part of a dedicated family driven by a strong desire to provide cutting-edge technology solutions that enable millions of people and businesses to achieve more daily.

Partner with a growth-driven company that...

- Provides innovative technology solutions of the highest quality
- Is reliable and trustworthy
- Cares for and holds her customers in the highest esteem
- Is intentional about her relationship with her partners
- Was recognized as one of the 'Companies to Inspire Africa' in 2019
- Is result-oriented and data-driven
- Has garnered over a decade of expertise in her field
- Strives for world-class results

Visit seamfix.com/partnerships for more details

What's in it for you?

To name a few; you stand to gain...

- Immense incentives and loyalty bonuses
- Exclusive access to profitable market information proven to enforce product scalability
- Geographical business growth and expansion
- Exponential growth in market share and profit
- A competitive edge over market contenders
- Low risk, long-term business relationship

Be in good company, join our first-class partners

Let's work together to create
game-changing and **seamless**
experiences
